

MANAGES Customized medical travel to Israel for specialty care efficiently and effectively

COORDINATES All logistics for travel, medical and logistical support from door to door

ASSURES advocacy and problem solving in support of health care solutions throughout transport and hospitalization for the patient and the family.

 Holds exclusive contracts with leading hospitals and private clinic, assuring immediate access to any specialist, health facility or other expertise needed.

We work with patients from all over the world. We are dedicated to making every step of your medical treatment as comfortable and stress-free as possible, including accompanying you throughout the process with a staff member fluent in your language. Israel is the preferred choice for diplomats and employees from embassies, consulates and UN agencies, as well as private patients.

We work without prepayment. Payment is made when services are provided, directly to the health facility providing treatment. Patients can save approximately 25% and 35% in Israel compared to the cost of care US.

"Your Most Trusted Partner In Matters of Health"

ISRAEL KENYA

**We care for your health wherever you are.
Let us help you get the highest quality
medical services.**

“Enjoy your stay in Israel and take advantage of the wonderful tourist sites”.

MEDICAL TOURISM

Medical tourism is a fast-growing industry based on the need for the highest quality of medical care regardless of one’s location. Highly trained medical specialists, advanced medical technologies and facilities are not equally available throughout the world.

MEDICAL TOURISM IN ISRAEL

Israel offers advanced, world-class medical specialty care to people from all over the globe. In addition, as a world leader in medical biotechnology, Israel is also well-known for leadership in medical education and promoting international health care. Thousands of people come to Israel not only for medical care, but also for training in medical specialties. Likewise, Israel demonstrates her value of “tikkun olam” (healing the world) by providing medical training and health care infrastructure development beyond her borders, in many parts of the developing world including Kenya.

WHY ISRAEL

People of all races, religions and ethnicities benefit from Israel’s high value for the health of the individual. By subsidizing health care, Israel makes high quality medical care affordable.

A culture of ambition and a competitive and dynamic environment propel Israel’s powerful and continuous drive for excellence.

Specialties of excellence include but are not limited to: General surgery, oncology, cardiology and cardiac surgery, orthopedics, neurology and neurosurgery, women’s health (including IVF), specialized imaging, nephrology, gastroenterology and bariatric surgery, plastic surgery and others.
